Saumil Jain

saumiljain715@gmail.com | 7984879727 | Ahmedabad,India | LinkedIn: Saumil Jain | Github: jsaumil

A strong foundation in Data Science, Machine Learning, and Web Scraping, with knowledge of Agentic AI systems and MCP-based tool integration. Skilled in Python and backed by a strong academic background in mathematics and computer science. Passionate about leveraging data-driven insights to solve complex real-world problems and drive innovation in scalable digital solutions.

Education

Silver Oak College of Technology 2022-2026
B.Tech in Computer Engineering

Experiance

Tusker AI December 2025 - April 2026
AI - Engineer Intern Ahmedabad

- Developed a voice-based AI calling agent to automate business communication workflows, including customer interaction and scheduling. Built conversational pipelines and deployed the solution using Docker, gaining end-to-end experience in AI system development and deployment.

Shweta Technologies July 2025 - September 2025
AI - Engineer Intern Ahmedabad

- Built AI-powered calling agents for multiple business use cases and developed RAG-based chatbot systems for website integrations. Implemented lead generation automation tools and performed web scraping to support data-driven business workflows.

Projects

Gun Fire Posture Assessment: Github

- Developed a YOLO-based deep learning model to evaluate whether a person is firing a gun properly. The project involved collecting and annotating a custom dataset, applying data augmentation and preprocessing techniques, and training the model to differentiate between correct and incorrect firing techniques. Implemented the model for real-time inference to assess firing posture accurately.

Text to CAD: Github

- Built a browser-based tool that converts natural language prompts into 3D CAD models using a local LLM, compiled in-browser via WebAssembly and rendered with Three.js

SincNET: Github

- Transforming raw audio into meaningful features through advanced signal processing. From waveform visualization to pre-emphasis and beyond, it uncovers the structure hidden within every sound wave. Perfect for speech and audio analysis experiments.

Speaker Diarization: Github

- Built an AI-powered web app using Python, Streamlit, Whisper, and PyAnnote to automatically detect multiple speakers in audio files and generate accurate, speaker-wise transcriptions in real time, streamlining meeting minutes and interview analysis.

Certifications

Machine Learning internship by Cognifyz Technologies - View Certificate
Intro to Machine Learning - View Certificate

Skills

Languages : Python, Nodejs, MongoDB
AI - ML Fields : Supervised, Unsupervised, Neural Networks, Fine-tunning, NLP, Computer Vision, Transformers, LLM, RAG, Agentic AI, Prompt Engineering
Tools: GitHub, Hugging Face, Ollama, Playwright (Web Scraping), Docker, MCP
Frameworks: FastAPI, Streamlit, Tensorflow, Langchain, LangGraph
Soft Skills: Leadership, Teamwork, Problem-Solving, Public Speaking, Adaptability
